## ODex™

### What Is It?

ODex is a unique, patented mushroom (*Agaricus bisporis*), or champignon, extract. This species has been cultivated throughout the world for over 2,000 years and represents one of the most highly recognized mushrooms of human consumption, the traditional white mushroom.

### Uses For ODex™

**Intestinal Health And Natural Deodorization Support:** In Japan, champignon extract has been enjoyed for over a decade for healthy breath, body and gastrointestinal odor support. Unpleasant breath and body odors originate within the digestive system when bacteria decompose unabsorbed food from the stomach and small intestine. This forms undesirable and odorous substances such as ammonia, indole, skatole, tryptamine, mercaptan, hydrogen sulfide and amines, which are then absorbed through the intestine and into the bloodstream. As a result, these compounds reach the pulmonary alveolus and perspiratory glands, affecting breath and perspiration, respectively. The same odor causing compounds are produced in the lower digestive tract. Champignon extract has demonstrated the ability to help the body to deodorize naturally.\*

**Renal Health:** Furthermore, the accumulation of the compounds listed above may affect healthy renal function. The ability of champignon extract to act on these compounds also supports renal health. In addition, a study with champignon extract revealed that it promotes proper levels of creatinine, providing additional renal support. For these reasons, it is believed to help detoxify both the kidney and the liver.\*

### What Is The Source?

This product contains Champignon extract, or *Agaricus bisporis*, the traditional white mushroom; hypoallergenic plant fiber (pine cellulose).

### Recommendations

Pure Encapsulations recommends 1-2 capsules per day, in divided doses, with meals.

### Are There Any Potential Side Effects Or Precautions?

At this time, there are no known side effects or precautions. If pregnant or lactating, consult your physician before taking this product.

### Are There Any Potential Drug Interactions?

At this time, there are no known adverse reactions when taken in conjunction with medications.

#### Odex™

##### each vegetable capsule contains

champignon extract ( <i>Agaricus bisporis</i> ) .....	53 mg.
malic acid .....	23 mg.
dextrin .....	175 mg.
(hypo-allergenic plant fiber added to complete capsule volume requirement)	
<b>1-2 capsules per day, in divided doses, with meals.</b>
